

Director of Instructional Technology
Report to the Pittsville School District Board of Education
Monday, May 9, 2022

VoIP Phone System:

- Creating custom data cables.
 - Relocating the phones for various employees to be in a more user friendly location than the standard cord allows.

School-Year and Summer Projects:

- Our high school student intern, Tyler Hanutke, continues to be a great asset to the IT Department via the Youth Apprenticeship program.
- The inventory, configuration, and asset tag processes for the new student Chromebooks and teacher laptops continues.
 - The reimbursement process for the Chromebooks will begin once we receive our updated commitment letters.
- The new district website should be released before the end of this school year.
 - Mobile device friendly, updated appearance, and improved navigation.
 - Data from our current website was cloned to the new website platform on April 13.
 - The vendor is updating the website coding as necessary.
 - Our reorganization, reconfiguration, and preparation for the release of the new website continues.
- The district submitted an application for Round 3 of the Emergency Connectivity Fund seeking reimbursement for the district's current eligible hotspot service between July 1, 2022 and December 31, 2023, as well as 90 tablets.
